LISTO - A 3D Simulation Game for Teaching Flood Disaster Response to BISCASST College Students

Listo is a 3D simulation game that immerses players in a realistic flooding scenario caused by an ongoing typhoon. Players take on the role of Kian Di-Matibag, a young resident caught in the rising floodwaters.

Game Mechanics

Game Includes:

Survival

The Player must survive the rising flood caused by the typhoon.

Trauma Bar

The Player has an bar but is represented by the main character's sanity. Failure of some tasks or the flood reaching certain levels will decrease the Player's sanity.

Puzzle Solving

The Player must solve some puzzles or collect some items or tools that may help the Player in the long run.

Save Yourself

Reach the roof to save yourself!

UNIQUE SELLING POINTS

The game elements that set Listo apart from any other survival simulator games:

Flood Mechanics

The rising flood mechanic Listo has is different from any usual flooding mechanics. The flood acts as an enemy boss that causes despair to the main character. This mechanic creates tension for the players.

Reverse Health Bar

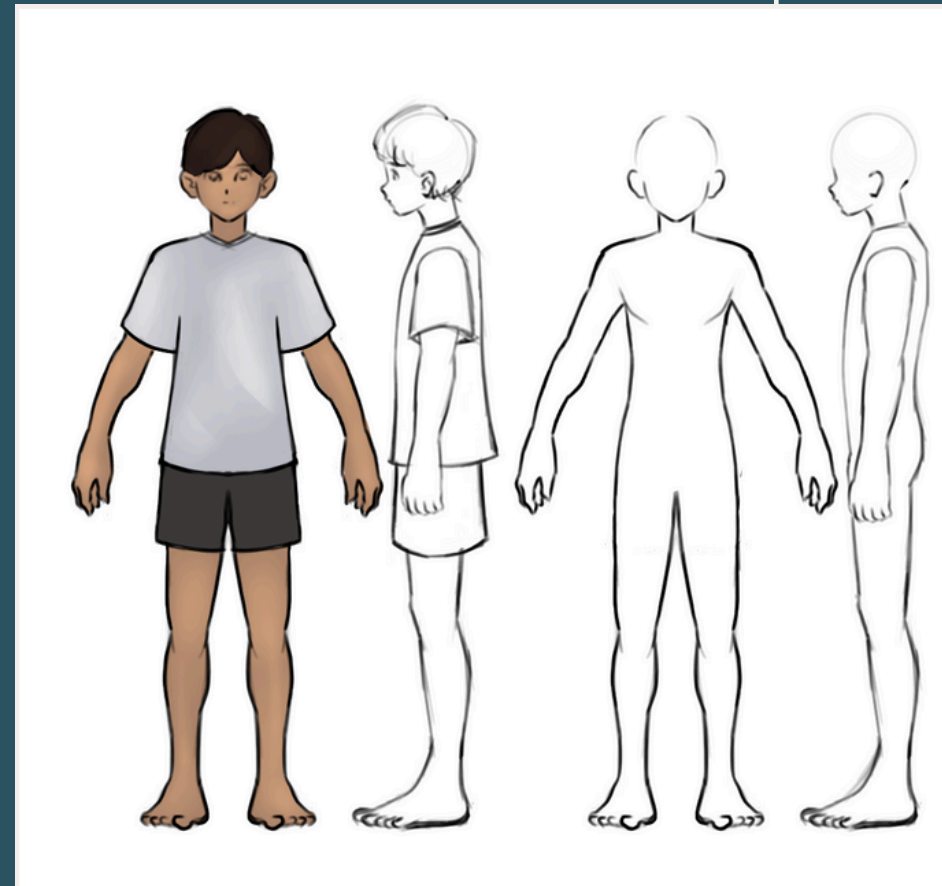

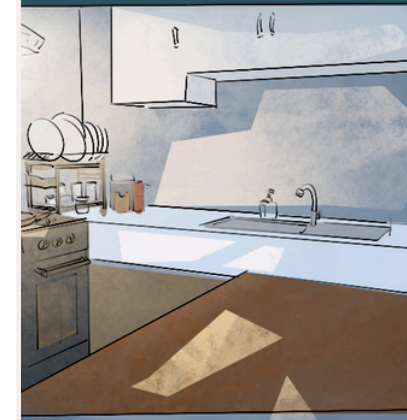

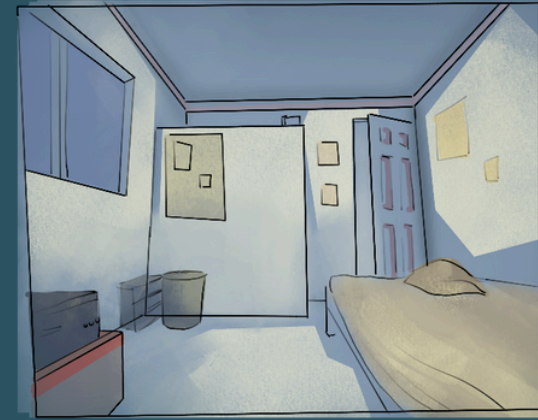

The health bar of the player is replaced with a trauma bar and instead of Health reducing little by little, the trauma bar accumulates until it's full. The more trauma the player have received, the harder it will be to move and see within the game.

Educational Thriller

Listo shows what a terrifying typhoon can do even to the most prepared person out there. It creates a thrilling experience while teaching valuable tips and advice on what to do to prepare and respond during a strong typhoon.

Game Art

 - Listen to mom's tips!

- **FLASHLIGHT**
 - Helps in the dark

- **SCREWDRIVER**
 - Helps a lot

NARRATIVE AND STORY

Preparation

In this level, Kian receives a message from his mother stating that she can't come home due to an emergency in her workplace. Kian is forced to do everything he can to prepare for the upcoming typhoon.

Response

Kian is astonished by the rushing flood from outside, slowly seeping in their home. He realized that whatever preparation he did won't be able to stop what's about to happen.

Restore

Kian successfully got up the rooftop to save himself from the rising flood. He was rescued and was later on received treatment for the trauma he suffered. Days went by, and Kian is now home, helping his mother clean up after the flood has dissipated.
